

Nature

Author: Maya menon

Illustrator: Maya menon

Level 2

The colors of the rainbow are red orange yellow green blue and purple. A rainbow is a multi colored arc that forms in the sky.

Trees are very important to earth because it gives oxygen to people. If we did not have trees we would not be able to breathe.

Flowers did not always exist they first appeared 140 million years ago. Broccolis are actually a flower. Some plants like orchids do not need soil to grow they get all of their nutrients from the air.

Rain occurs on other planets in our Solar System but it is different to the **rain** we experience here on Earth. Rain falls in the form of water droplets, this is called precipitation. Rain can also fall in the form of snow or hail.

Snow is light and fluffy but dangerous snowstorms come often in places that are cold like for example, Alaska. Snowstorms can come on snowy mountains.

Birds come in many colors. They also come in many breeds, like the sparrow, robin, red jay (shown in picture above), blue jay and lots more. Birds are all beautiful in different ways.

Mountains have lots of snow sometimes and mountains supply fresh water to half of the world's population. Mountains can be very rough and hard to climb.

Nature

(English)

It is about nature. Like birds, trees and more!

This is a Level 2 book for children who recognize familiar words and can read new words with help.

Pratham Books goes digital to weave a whole new chapter in the realm of multilingual children's stories. Knitting together children, authors, illustrators and publishers. Folding in teachers, and translators. To create a rich fabric of openly licensed multilingual stories for the children of India and the world. Our unique online platform, StoryWeaver, is a playground where children, parents, teachers and librarians can get creative. Come, start weaving today, and help us get a book in every child's hand!
