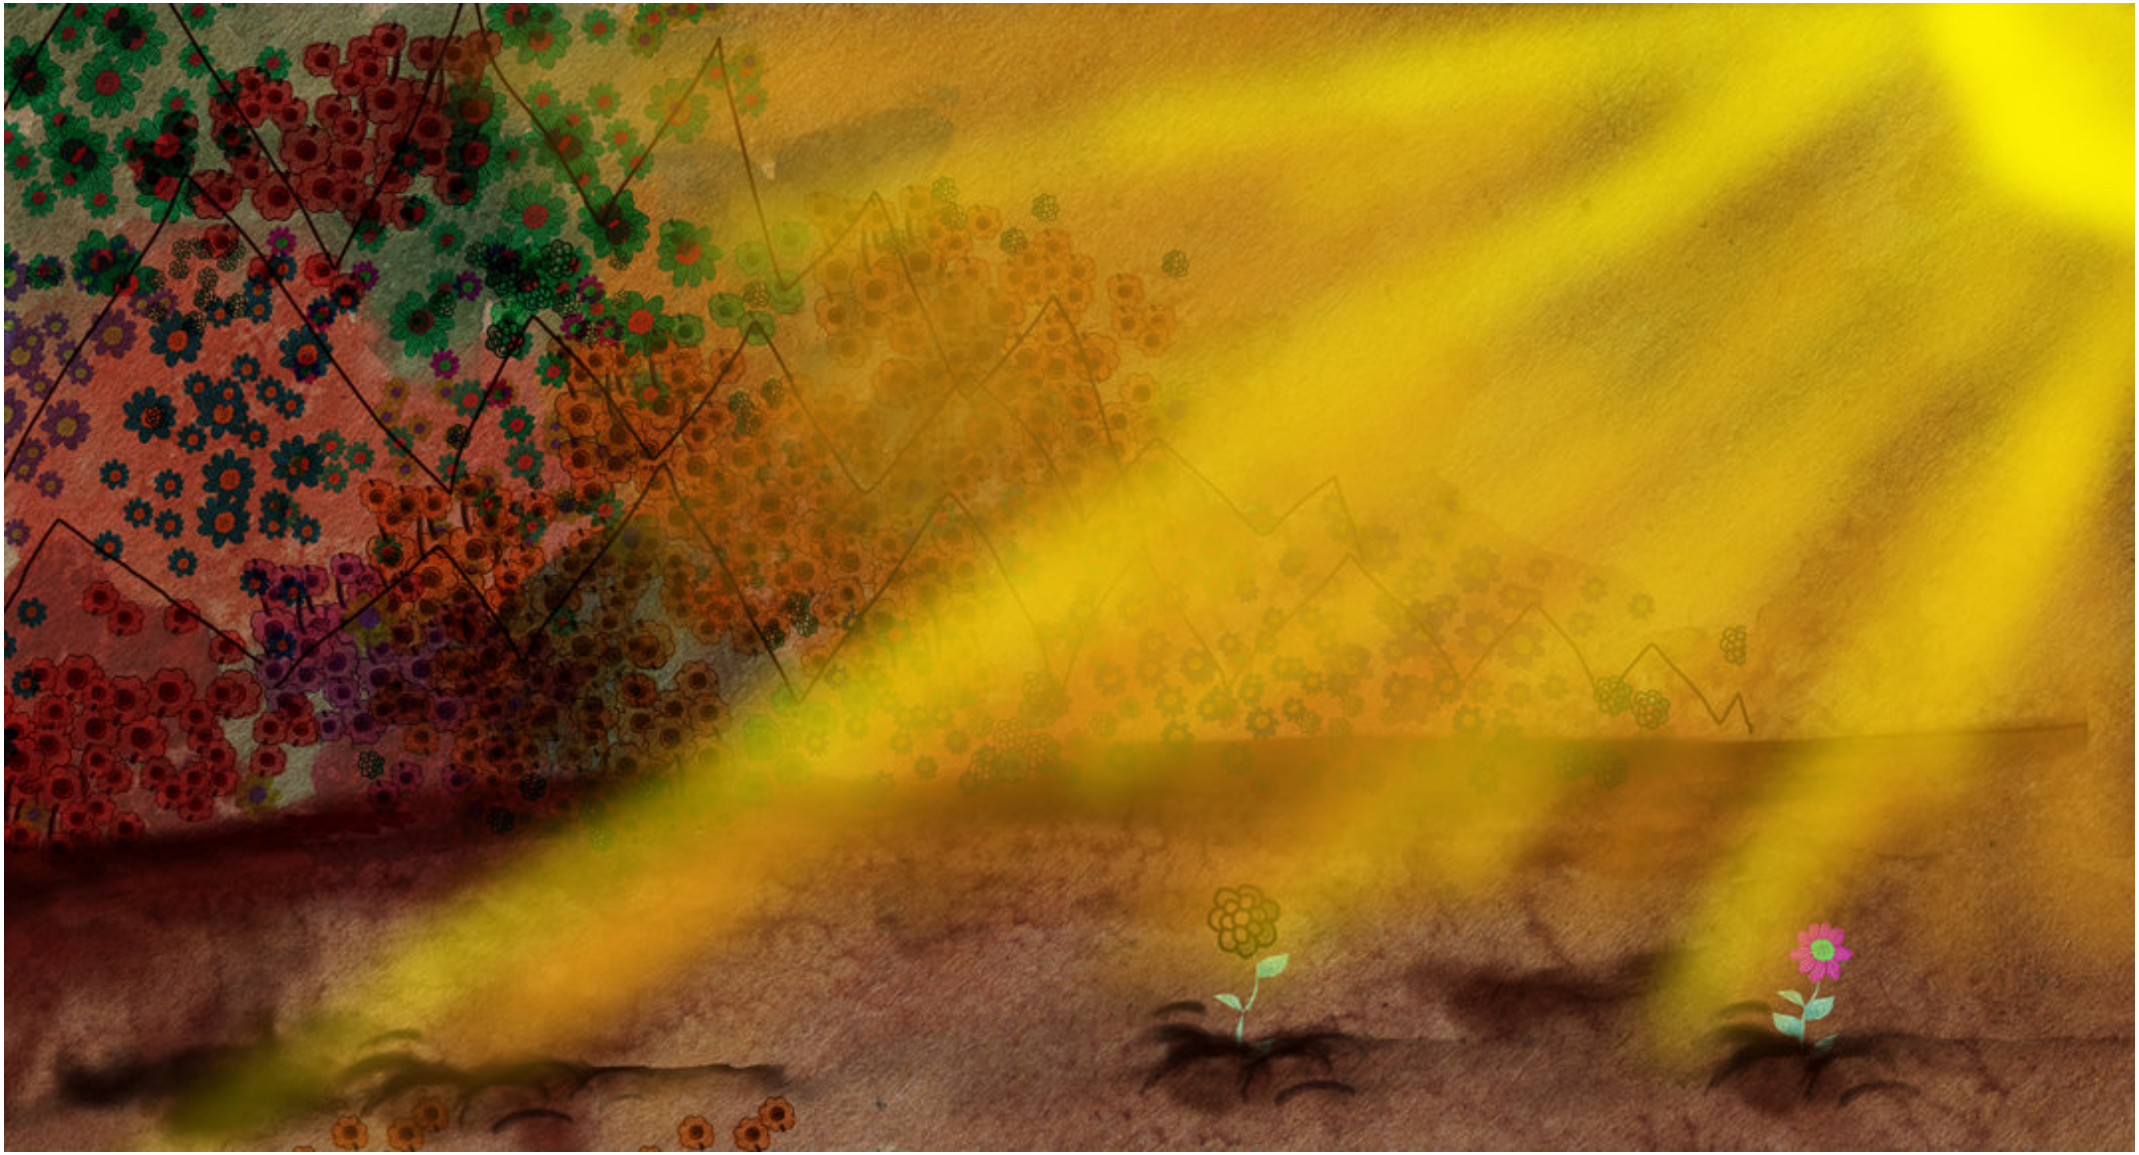
How time came to be

Author: Swetha Prakash
Illustrator: Sonal Gupta

Level 1



Once upon a time, everything existed in a time wrap. In this time wrap, all creatures were caught. They would keep going back and forth between the past and future. It caused a lot of chaos. So it was decided that time would be linear. It would move from the past to the future. The sun decided to be the keeper of time and all of life depended on its movements. When the sun was awake, life was awake. When the sun slept, life slept.
